

Building Roll Shutters is
now easier than ever!

Introducing the New E-Tempest Roll Shutter Calculator...

E-Tempest's new Roll Shutter Calculator brings the power and flexibility that you have come to expect from the E-Tempest Software Suite to the world of Roll Shutters.

Check Out these Powerful Features!

1 Quickly Design Your Shutter

Using the system perfected in both the Panel and Accordion Calculators, you will be able to quickly enter and adjust your roll shutter.

2 Integrated Design Pressure

E-Tempest's powerful Design Pressure Calculator will calculate the maximum span and indicate which tracks can be used to build a Shutter that meets code.

3 Let E-Tempest help you design your shutter

From hood sizes and reel diameters to motors and cranks, the Roll Shutter Calculator will recommend design choices based on the size, weight and Design Pressure of your shutter.

4 Know Your Costs

Know your exact costs and square footages per shutter and for the entire Job. Include all costs including Assembly and Installation.

5 Know Your Profit

Based on the sale price for each shutter, instantly know your margin and profit.

6 Know what you need for Assembly

Comprehensive component reports list and total all the components you need for one or more jobs by component type and supplier.

7 Optimize your Cutting

Save thousands of dollars in material costs. The Powerful E-Tempest Cut Optimization Wizard allows you to minimize scrap by combining orders into high-yield cut jobs.

8 Easy to follow Shop Reports

Eliminate mistakes, reduce costs and increase efficiency... Assembly and Packing reports make sure that you know exactly how to build your shutters and what material you will need at the Job Site.
